

# SPLITTERS & COMBINERS

SPLT-COMB

PM Microwave designs and manufactures a wide range of RF power dividers and combiners. The layout and the quality of the components used guarantee very low loss, high isolation and a good VSWR on all ports.

The devices are designed for various applications of RF signals distribution: for example, one can connect two modems to a single antenna or two antennas to a single modem.

Please contact Microwave PM for more information or customization of the modules.
